What We Will Do in this Session

- Google is a powerful tool for teaching and learning.
- Discover Google Apps that are great for the classroom.
- Learn how to use documents and other features in Google Drive.

BEST WAYS TO USE GOOGLE IN THE CLASSROOM

A SUPER Powerful Search Engine

As the most popular search engine in the world, Google handles **three billion** queries a day.

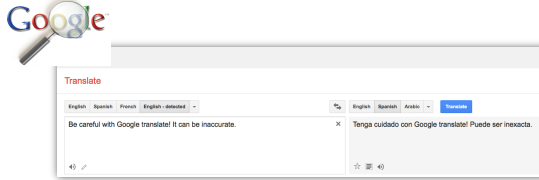

If Google can't find your answer, it just may not be found.

But the search engine itself is not the only source of information.

Through Google's many tools and apps, teachers and students can quickly hone in on the information they need.

Google Translate – change text into one of 90 languages. Not only is this helpful when translating educational material, it can also be an effective way to communicate with students or parents who might not share your first language.

Google Earth – whether it's understanding the sheer height of Mount Everest or looking at the proximity of middle eastern countries, Google Earth lets you take your students on a visual tour that is often more effective than photos.

Google News – what are the most important things that happened in the world today? Google News can keep you and your students updated. This site curates news from major news sources. You can also personalize the settings to make it more appropriate to your readers.

Google Goggles

Google Goggles is an app that performs searches visually and gives you the answer.

Search for pictures with Google Goggles

You can do a Google search by taking a picture with your device using the Google Goggles app.

How to search for an image

1. Open the Google Goggles app.
2. Point your camera in the direction of the item you want to search for.
3. Touch the photo icon.
4. If Google recognizes the image in your photo, the search results will tell you about what's in the photo.

Tip: Horizontal photos work better than vertical ones.

Google Books

Google Books provides the world's index on the latest books. Some may be free to read online and others can be purchased, but this site is a great place to get the pulse on the latest literature on your subject.

Google Scholar

If you and your students are looking for scholarly research, this search engine can point you to the right literature, online and digital.

 **Google Alerts**

Set up an alert that will send you an email whenever a new item with your keyword shows up.
